

ZEPPELIN Mobile Rescue Station

On booth No. FG5-04, in the outdoor area, ZEPPELIN MOBILE SYSTEME GmbH will display a Mobile Rescue Station.

ZEPPELIN Mobile Rescue Stations are self-sufficiently operating, shelter-based, medical emergency care systems, which are designed for operation on vehicles. ZEPPELIN Mobile Rescue Stations can be put into operation on all truck chassis with 20' container frames.

This truck-mounted Rescue Station is realized in a double-side expandable 20ft shelter towing a trailer with another shelter equipped as a pre- or post-operation unit.

The Rescue Station supports all ATLS (Advanced Trauma Life Support) functions

- Ensuring the breathing
- Securing the airway
- Securing the blood circulation
- Stopping bleeding
- Emergency operations
- Initial treatment for stabilization prior to transportation
